Hello again. I have a small observation that I would like to share with you.

- 1) US Government persecutes, sorry, I mean prosecutes Microsoft - shortly thereafter the economy drops through the basement and I find myself out of a job. With a wife and 4 kids I might add.
- 2) AOL/Time Warner files all kinds of suits against Microsoft yet the US Government never bothers to see if THEY just might be a monopoly - and a vicious one too.

Just for once, how about letting someone who is successful help his country's economy and let me get back to work.

I wonder if anyone up there in the government stratosphere has noticed that the computer industry is now the only place where we have any kind of a serious advantage anymore. Let's not destroy it.

W. Craig Westlake
